

Contest Rules

French IoT, Impact x Technologie

Edition 2022

1 Contest Organization

Docaposte IoT, a simplified joint stock company with share capital of 1,000,000 euros, registered with the Créteil Trade and Companies Register under number 808 154 181, having its registered office at **45 blvd Paul Vaillant Couturier – 94200 Ivry sur Seine** (hereinafter "the Organizing Company"), is organizing a national contest around connected objects and services titled "concours French IoT, Impact x Technologie" of La Poste Group (hereinafter "the Contest") from March 03 to Juin 16 included, of the year 2022, under the conditions defined below.

The contest is organized in partnership with 5 co-sponsors : Fonds FHF, Malakoff Humanis, SNCF Gares & Connexions, CFI Group, and Pôle emploi alongside La Poste Group, its branches and subsidiaries including DOCAPOSTE and La Poste Immo.

This contest receives the support of key partners of digital and innovation ecosystems in the French regions (CCI, clusters, French Tech Metropoles, incubators, ...).

A regularly updated list of our partners is available on request by mail : french-iot@docaposte.fr.

This contest is designed to support innovation in connected services by bringing together start-ups, innovative SMEs and large groups. It is thus a question of:

- Detect and enhance innovative connected services with a positive impact on society or environment ;
- Create value to users by delivering new services to simplify their daily lives
- Accelerate the development of connected services involving start-ups and corporations in a co-innovation approach.

The ambition : Support start-ups developing digital solutions with positive impact and help them accelerate their business, so they become reliable partners to work with corporations, to meet

tomorrow's greatest challenges. Act for a committed digital innovation, with a goal to reach gender parity and boost female entrepreneurship.

2 Participation to the contest

Participation to the Contest is free and without obligation to purchase.

The Contest is open to innovative start-ups, SMEs and small businesses with a start-up dynamic, registered in France or living abroad with a will to develop a business in France :

- Having a connected service and/or a service based on a digital solution : application, online platform, technology bricks...
- Having a working prototype or a solution at the pre-commercialization stage or marketing stage
- The solution must have a positive impact on the society or the environment

The digital solution must fit into the scope of one of the 4 Challenges described below :

➤ LOCAL SERVICES

Solutions contributing for a better living through local, inclusive and environmentally friendly services.

Personal Services

- Easier relations with the close environment (shops, neighborhood, city)
- Local solutions with a positive social and environmental impact, for better and responsible consumption
- Local services that can be operated by Postmen
- Solutions offering a complete customer experience for families, caregivers, students, ...i.e conversational assistant, augmented reality
- Tools and solutions to facilitate administrative tasks (for families, caregivers, students, refugees, when moving...)

Animation & Social Ties

- Intelligent solutions to territory animation and neighborhood information (app for neighborhood and access to local shops, ...)
- Solutions to ensure diversity, access & social, improved comfort for residents, including people with disabilities...
- Sharing solutions of local expertise and best practices in post offices
- C2C solutions for the exchange of products and services between individuals
Tools of co-ownership management: property management, ...

Silver Economy

- Daily support for administrative assistance, requests, financial aid, digital training
- Access to local services (simplified banking relationship, delivery services)
- Intergenerational projects simplifying and enriching local ties (neighbors, family, relational)

Smart Building and Real Estate

- Waste management, recycling and reuse of objects
- Smart buildings solutions to make them self-sufficient in energy/heating or with a reduced ecological impact (low carbon buildings, smart grids, self-production and self-consumption)

- Solutions to measure quality of life and ensure safety inside the house
- Solutions to facilitate and secure home deliveries, remote customer services (connected lock, connected cameras, remote monitoring...)
- New uses for housing and buildings (co-living, participative housing, innovative living and working places, modular spaces...)

Logistics & Mobility

- Urban logistics and delivery services
- Logistics and delivery of local products in short circuit, e-C2C, local e-commerce
- Innovative, sustainable and affordable urban mobility solutions, or solutions facilitating sharing or even avoiding travel
- Reinventing travel user experience: services that facilitate intermodality or facilitate travel for people with disabilities.

➤ **e-Health**

Solutions contributing to a better prevention and more flexible medical follow-up, in an ethical framework.

Digital care Pathways

- Orientation and access to care
- Personalized treatment pathway
- Preventive medicine and early detection of pathologies
- Pre-hospitalization and post-hospital care
- Remote chronic diseases monitoring, telemedicine
- Solutions improving patients' quality of life
- Digital therapy
- Therapeutic education

HR and QWL for health

- Services to assist in the recruitment of healthcare professionals
- Services to improve the QWL of healthcare professionals
- Solutions to promote health at work

Interoperability of Healthcare Information Systems

- Easy to connect and interoperable solutions
- Data pseudonymization, anonymization, traceability

Big Data and AI

- Clinical research (real life data, health data market place, ...)
- Medical decision support (diagnosis and treatment)

Digitization of processes (administrative and business)

- Hospitals, health care centers workflows optimization

➤ **Services to Territories**

Solution contributing to the development of territories by providing solutions for employment and education. Strengthen the cross-generational link and think of new experiences of access to administrative services

Employment and Education

- Supply and maintenance of EdTech tools, support in the learning process in initial or continuing education
- Innovative pedagogical practices
- Solutions for online education, dematerialization and distance learning
- Data analysis, predictive studies
- Solutions to facilitate the connection between job seekers and recruiters, identification of skills, and certified skills
- Self-service digital tools to support the return to employment (cover letter generator, services for seniors, specific services related to disabilities)
- Offer digital services for specific audiences (young people, long-term job seekers, etc.)

Gov Tech

- Digitize processes and services to modernize of the administrations and simplify administrative procedures
- Pre-qualification of data collection areas
- Mobile sensors for measuring quality of life (pollution, pollen, electromagnetism, ...)
- Data analysis, predictive approach (ecological transitions, ...)
- Uses of public data sets to provide more efficient and targeted public services (data for good)
- Cyber security solutions dedicated to local authorities
- Grant management solution (allocate the right grants to the right people at the right time)

Civic Tech

- Collective tools to engage citizens and generate behavioral change
- Collective intelligence platforms or applications
- Tools to simplify citizen requests processing

➤ **B2B Services**

Solutions contributing to simplifying companies' operations through advanced, secured, ethical and eco-designed technologies.

HR tech, tools for Business users

- Solutions facilitating remote working
- Solutions improving quality work life
- Tools supporting business users (process, workflow automation...)

Technical and administrative support

- Solutions facilitating administrative workflows (invoice management, client recovery, legal, accounting, ...)
- Supervision and reporting tools designed for service provision, Business Intelligence
- Augmented advisor able to provide accurate information to customers
- Evaluation, qualification or labeling solution designed for home care workers

Customer expérience and Customer relationship

- Easy access and connection to services
- Enhanced or simplified customer experience on physical or remote sites (animation, interaction, ...)
- Smart conversational assistants (voice assistants, advanced and specialized by business disciplines chatbots, ...)
- Natural language processing (emotion analysis, semantic analysis, ...)
- Help writing documents or messages for non-digital native people
- Solutions promoting contactless interactions

- Customer knowledge (CRM, tracking, predictive analysis, attendance rate, ...)
- Low code based solutions (apps, market places, man-machine interface, ...)

Data centric

- Semantic verification, social networks e-reputation analysis
- Technologies transforming documents into pure data, including modification and evolution of uses
- Data governance and data viz automated tools (creative dashboards, augmented reality, ...)

Digital trust

- Data anonymization
- Cybersecurity (cryptography, tokenization, passwordless authentication)
- AI-based fraud detection technologies
- Smart contracts applications

Only one entry is authorized per legal person (hereinafter the “Participant (s)”) during the duration of the Contest. If it turns out that a participant has sent several applications, his application will not be considered.

The attribution of prizes by the Organizing Company to the selected legal persons (hereinafter the “Winners”) must not put the Organizing Company, its co-sponsors and their employees in conflict of interest with the Participants. By participating in the Contest, Participants certify that there is no conflict of interest with the Organizing Company, its co-sponsors and their collaborators.

The staff of the organizing company and the cosponsors cannot compete, the French IoT, Impact x Technologie, Impact x Technologie laureates who have already benefited from the accelerator program, as well as all those who participated in the development of the Contest.

3 Terms of participation

Participation in the Contest implies full and complete acceptance, without restriction or reservation, of these Contest Rules, the decisions taken by the Organizing Company relating to the Contest, the rules of ethics in force on the Internet, as well as the laws, rules and other standards applicable in the territory of the Contest. Any person who contravenes one or more of these rules may be deprived, at the discretion of the Organizing Company, of the right to participate in the Contest, as well as, where applicable, of the endowment obtained.

The Organizing Company also reserves the right to claim any additional damages and interest from the offender. Participation in the contest is carried out by completing the complete application form online at <https://concours-french-iot.laposte.fr/>, and in particular by providing the following information :

1. The company's identity form (name, date of launch, full address, phone number, SIRET number, legal structure, contact person, theme, website and SM links)
2. The project description. The Participant is asked to :
 - Briefly describe the project in 240 characters max (elevator pitch)
 - Describe the story of the creation, where did the idea comes from ?
 - Add a link to a video pitch (short presentation) of maximum 2 minutes. The Participant is asked to film himself or herself alone or with the team, presenting the solution ;
 - Specify the company's major societal commitment ;
3. Points to develop in the application form :
 - The description of the solution from the USAGE perspective (problem/need addressed, benefits for the user)

- The description of the solution from the TECHNICAL angle (technology base used, main functionalities, user journey, patents)
 - The description of the positioning from an INNOVATION point of view (existence of competing or alternative solutions, differentiation factors, added value, ...)
 - Details on the BUSINESS MODEL (targets addressed, market size, economic model, distribution channels, turnover, customer references, traction and financial KPIs...);
 - The major SOCIETAL COMMITMENT : description of actions that prove this commitment
 - Project FINANCING: shareholding, financing history, fundraising, crowdfunding campaign(s)
 - The PRIDES : awards or emblematic distinctions obtained
 - Project MATURITY : concept – prototype – pre-production – commercialization
 - The FOUNDING TEAM (founders, partners, their professional and/or entrepreneurial background, board members, etc.)
 - The EXPECTATIONS of the French IoT program: added value sought with the experimentation fields
 - The SYNERGIES envisaged with La Poste Group and its partners (description of the use case)
4. Open forum : The possibility is left to add additional elements or arguments in the form of texts or added document (presentation slides, video, business plan, etc.).

Information provided by Contest Participants must be accurate, truthful and complete. Only complete applications will be considered. In particular, video content is expected in order to fully understand the proposed activity and service, and to discover all or part of the team (in the form of pitch rather than motion design).

The Organizing Company reserves the right to check the accuracy of the information provided by the Participants by asking them, where applicable, to justify the accuracy of said information.

4 Contest process

4.1 The application form

Applications can only be submitted online to the following address: <https://concours-french-iot.laposte.fr/>. No paper files or files transmitted through any other channel will be accepted. Applications will be submitted from 2022, March 03 until 2022, April 08 at midnight.

From this date, changes to the application file will no longer be possible. However, the Participant will have access to his published file and to the status of his application on <https://french-iot.yoomap.fr>

Each participant is invited to carefully select his or her geographical area (region), as well as the theme in which the solution fits. This information is required for the selection steps.

4.2 The selection

The selection will take place between April 08 and June 16 of the year 2022. At each selection stage, a rating will be assigned on the basis of the following main criteria:

- The quality of the SOLUTION (technical quality of the concept, level of differentiation from the contest, feasibility...)
- The INNOVATIVE character (degree of innovation or rupture, originality, possible "wow" effect...)
- The BUSINESS MODEL (market, quality of the business model, economic, social, environmental impact, synergies...)
- The service rendered or the USE (potential utility addressed, market appetite...)
- TEAM (skills, motivation, complementarity, networks...)
- SOCIETAL COMMITMENT, (positive impact of the project on society or the environment)

The selection process in 3 stages :

- First stage : regional evaluation

For Participants registered in France, this first stage of evaluation takes place in each region by a committee that will qualify the applications on the basis of the 6 criteria mentioned above. This selection level is based on the evaluation of all applications received. and eligible in accordance with the provisions of the rules by representatives of La Poste Group and the expert partners in each region.

The Participant is invited to consult the list of the digital partners in the region, which is available on request from the regional representative or the French IoT, Impact x Technologie contacts (see 1. Organization of the Contest).

For Participants registered abroad, the evaluation will be carried out directly by innovation, business and digital experts of the Organizing Company and the co-sponsor groups.

Any application receiving a favorable opinion and an average score more than 3/5 will be eligible for the second stage of the selection.

- Second stage : Evaluation by the experts

Applications are evaluated by theme by the innovation, business and digital experts of the Organizing Company and co-sponsor groups on the basis of the 6 criteria and the regional evaluations carried out in stage ;

The applications receiving the highest ratings at this stage will go on to the third stage.

- Third stage : Start-up audition and final jury

During this stage, the Participants who succeeded in the second stage will be invited to pitch in front of a committee made up of Innovation, Business and Digital experts of the Organizing Company and co-sponsor groups.

At the end of this stage, a final jury will select the winners who will enter the French IoT, Impact x Technologie acceleration program, within the limit of 14 start-ups.

Among the applications with the best ratings, 50 start-ups will join the French IoT, Impact x Technologie community.

4.3 The members of the jury

The members of the selection jury are appointed by each of the co-sponsor groups for their Innovation, Business, Digital and IoT expertise.

The members of the jury rule sovereignly. No appeal against their decision will be allowed as to the results. The composition of the jury may be subject to change.

4.4 The announcement of the results

Winners will be notified by any means based on contact information provided by the Participant. The results will also be posted on the contest organizers' web pages.

Any winner who does not reply within three working days of notification of his/her final selection will be deemed to have withdrawn his/her final selection.

5 Endowments

The contest has two levels of endowments:

[Start-ups joining the French IoT, Impact x Technologie community](#) (according to the selection criteria as defined above).

They will benefit from the following advantages provided by La Poste Group through its French IoT, Impact x Technologie Program:

- Dedicated animation (newsletters, invitations to internal or external events, others...)

- Access to the private group of the French IoT, Impact x Technologie community on Social networks
- The network (linking up with the group's libraries or partners).
- Visibility and promotion of the French IoT, Impact x Technologie community (notably on events such as SIDO, Viva Tech, Lab Postal, etc.)

Start-up Laureats accessing the Accelerator program

They will benefit from the following advantages provided by La Poste Group through its French IoT, Impact x Technologie Program :

- A 6 months accelerator programme with experts (bootcamp, workshops, coaching, mentoring, ...) to boost the project development (this period can start at the end of August and end at the beginning of March)
- Business connections with La Poste Group and French IoT, Impact x Technologie corporations partners (demo days, pilot project, partnerships, ...)
- Advice on business plans, fundraising strategy crowdfunding campaign. Connection with VC's
- Become part of the French IoT, Impact x Technologie community with more than 300 entrepreneurs : news sharing, best practices, networking
- High visibility and participation in the most popular innovation events : BIG, CES, Vivatech, IFA (according to schedule)
- Access to privileged offers : user or technical tests, digital platform services, ...
- These allocations are fully covered by the La Poste Group, it being understood that pilot projects are also proposed by the co-sponsors.

The winning start-up will receive additional benefits from the co-sponsoring partners if their solutions are being accepted:

SNCF Gares & Connexions :

- Promotion in internal SNCF events, through pitches organized by the innovation and digital teams;
- Access to testing ground, depending on the maturity of the solution and the support capacity of the regional departments;
- Promotion within our ecosystem, depending on the partnership relationships established with the winner;

FHF funds:

- Acces to testing ground and experiments, according to criteria and maturity of the solution, in particular in healthcare institution
- Benefit from experts advice (regulations, business expertise, strategy, etc.);
- Visibility of start-ups to more than 800 healthcare institutions thanks to the Hospi'Up tool, the hospital-start-up collaboration guide initiated by the FHF.

Malakoff Humanis:

- Acces to testing ground and experiments, according to criteria and maturity of the solution,
- Benefit form experts advice (regulations, business expertise, challenge of the business plan, financial and strategic elements by qualified employees, etc.);
- The possibility of having prototypes of offers, products or services tested by volunteer employees at MALAKOFF HUMANIS
- Promote start-ups during events, in publications, with clients
- Privileged access to startups to present their project, pitch to the Malakoff Humanis innovation committee;

Pôle Emploi, Open Innovation Department:

- Referencing on the Nov'Us platform (Pôle Emploi version of startupflow)
- Organization of Pitch@Pôle sessions to present the solutions to Pôle Emploi (in the DG and to the network of agencies) - this includes preparation for the pitch and debriefing by the Open Innovation teams.
- The possibility of testing or experimenting solutions, with Pôle Emploi at the national or regional level

CFI:

- Benefit from the advice of the commercial and/or technical teams to improve the development axes ;
- Access to calls for tenders, particularly from central purchasing agencies in various sectors, such as education, health, retail, smart city and smart office;
- Connection with our ecosystem of partners to create synergies;

This list should not be considered mandatory. However, the Organizing Company and the co-sponsor groups reserve the right at any time, and if circumstances so require, to modify and replace the Offers initially planned with other offers of an equivalent level.

The award of prizes rewards the best applications in accordance with the criteria set out in the Regulations.

The allocation is confirmed if a partnership agreement is signed with the Organizing Company at the latest 1 month after the announcement of the results.

The endowment is nominative and non-transferable, and participants are informed that the sale, transfer or exchange of endowments is prohibited.

Unallocated endowments will remain the property of the contributors.

However, the Organizing Company and the co-sponsor groups reserve the right, at any time and if circumstances so require, to modify and replace the Offers initially planned by other Offers of an equivalent level.

The prizewinners undertake to use the prizes fairly and in accordance with the conditions of use. The prizes may under no circumstances give rise to any challenge of any kind on the part of the prizewinners. In particular, they may not give rise to:

- The delivery of their cash counter-value,
- Their replacement or exchange for another Offer for any reason whatsoever, except with the formal agreement of the Organizing Company and its co-sponsors or due to the inability of the contributors to provide the Endowments to the Prize Winners.

6 Right of access to personal information

This Privacy Policy sets out the principles and guidelines for the protection of Personal Data in compliance with the General Data Protection Regulation (GDPR).

7 Content and comments

By participating in the Contest, any person undertakes not to communicate or publish, directly or indirectly, any content (such as visuals, videos, texts, comment areas) that would be likely to harm the image of DOCAPOSTE IoT or that of a third party, to harm the intellectual property rights of a third party, to denigrate a third party and, in general, to contravene any legal or regulatory provision in force.

In the event of non-compliance with these provisions, DOCAPOSTE IoT reserves the right to cancel the author's participation in the Contest and the company as soon as it becomes aware of this. The author may be held civilly and/or criminally liable.

8 Intellectual Property

The Participant guarantees to hold, directly or by license, all the intellectual and industrial property rights of the product or service presented within the framework of the Contest.

The Participant retains full and complete ownership of his product or service entered in the Contest. The Contest does not grant any license to the Organizing Company and the co-sponsor groups on the Participant's product or service.

Nevertheless, and only in the context of communication related to the Contest, the Participant authorizes the Organizing Company to communicate to the press and to publish and reproduce on the Contest website the commercial name of the legal entity and the trademark(s) associated with the product or service presented during the Contest.

The Participant shall be responsible for any dispute by a third party relating to the intellectual property rights attached to the proposed product or Service and shall indemnify the Organizing Company against any consequences resulting therefrom, in particular financial. New terms will be defined between the finalist winners and the organizing company within the framework of a specific partnership agreement as soon as pilots and experimental sites are set up.

The use of all or part of the Contest Website does not imply any transfer of intellectual property rights of any kind to the Participant in respect of the elements belonging to DOCAPOSTE IoT or for which the latter has received authorisation.

9 Participant's image rights

As part of the communication related to the Contest, each Participant authorizes, free of charge, the Organizing Company, directly or indirectly, to record and exploit, in France and concerning the Internet for the world in view of the global nature of the Internet, its image on any medium (photos, films, audio, etc.) as well as its presentations of the application file.

To this end, the Participants authorize the Organizing Company, for two (2) years from the submission of the application file, to represent, reproduce, disseminate and exploit the image of the Participant.

Participant guarantees Docaposte IoT that he/she has obtained prior permission for any video, image, or use of first and last names from each person on the "team" featured or mentioned in such content. Docaposte IoT reserves the right to request evidence of such prior authorization from the Participant. In case of any claim or dispute, Participant shall be responsible for any claims made against Docaposte IoT by a third party.

This authorization expressly excludes confidential information as described in the "Confidentiality" section below.

10 Confidentiality

In the context of the Contest and the submission of entries, Participants may be required to disclose confidential information. To avoid any ambiguity, any information expressly qualified as confidential in writing by the Participant shall be considered confidential. The Organizing Company and the co-sponsor groups agree to keep confidential all information relating to the products or services presented during the contest. Nevertheless, as part of the communication associated with the Contest, the Organizer is authorized to:

- Communicate to the media (traditional media, online news sites, blog and social networks) and publish on the Contest website, the corporate name of the legal entity, the brand(s) associated with the product or service presented during the Contest, the name of the file, the names of the bearers of the application file,
- To make public the essential and non-confidential characteristics of the projects presented, without compensation of any kind.

This confidentiality obligation applies for the entire duration of the competition and for three (3) years after the end of the competition.

11 Modification / cancellation of the Contest

The Organizing Company reserves the right to shorten or extend the duration of the Contest, and to modify or cancel it if circumstances so require. The Participants could not call into question this decision nor engage the responsibility of the Organizing Company for any moral or financial damage. Additions or amendments to the Rules may be published before or during the Contest. They will be considered as schedules to the Regulations.

12 Liability

The liability of the Organizing Company is strictly limited to the delivery of the prizes effectively and validly won by the Participants. In any event, the liability of the Organizing Company is expressly excluded for any prejudice or indirect damage that may arise from participation in the Contest, or from the interruption or termination thereof, for any reason whatsoever. Indirect damages include, but are not limited to, any damages resulting from operating losses, commercial losses, loss of customers or orders, any commercial disturbance whatsoever, loss of earnings, loss of opportunity, loss of profit, damage to reputation or brand image, loss of data and files.

It is expressly recalled that the Internet is not a secure network. The Organizing Company shall therefore not be held responsible for contamination by any virus or intrusion by a third party into the terminal system of Participants in the Contest and declines all responsibility for the consequences of the connection of Participants to the network via the site.

The Organizing Company declines all responsibility in the event of malfunction of the Internet network, telephone lines or reception equipment preventing the proper conduct of the Contest. The Organizing Company shall not be held liable in the event that one or more Participants are unable to connect to the site due to any problem or technical defect related in particular to network congestion.

The Organizing Company shall make every effort to allow access to the Contest on the site at any time, without being bound by any obligation to do so.

The Organizing Company may, at any time, in particular for technical, updating, security or maintenance reasons, interrupt access to the site and to the Contest it contains. The Organizing Company shall in no case be liable for these interruptions and their possible consequences. The Organizing Company undertakes to do everything in its power to ensure that the system for determining the Winners and awarding the prizes complies with the rules of this Contest. If, despite this, a failure should occur and affect the system for determining the Winners, the Organizing Company shall not be liable to the Participants beyond the number of prizes announced in the Contest Rules. The liability of the Organizing Company may not be sought for any incidents that may occur as a result of the use of the awarded Offers. The Organizing Company may cancel all or part of the Contest if it appears that fraud has occurred in any form whatsoever, in particular in a computerized manner in the context of participation in the Contest or in the determination of the Winners. In such a case, it reserves the right not to award the prizes to the fraudsters. Any fraud or attempted fraud in the Contest by a Participant will result in the elimination of the latter, and may give rise to prosecution, before the competent courts, by the Organizing Company, of the authors of such fraud.

In any event, if the liability of the Organizing Company were to be recognized under the present terms and conditions by a final decision of a competent court, the compensation that could be claimed from it shall be expressly limited to the amount corresponding to the unit value of the lowest prize.

13 Force Majeure

The Organizing Company may not be held liable for the non-performance of its obligations under the Contest Rules if such non-performance is due to force majeure.

By express agreement, the events recognized by the jurisprudence of the French courts and beyond the control of the Party invoking the case of force majeure, of which it could not have been aware at

the time of the conclusion of the Contract, are considered to be cases of force majeure or fortuitous events.

In particular, force majeure shall include blockages or serious disruptions of the means of transport, including the Post Office, the means of telecommunications or the means of energy supply.

The obligations thus suspended may be performed again as soon as the effects of the cause(s) of non-performance have ended.

By way of derogation, in the event that an event of force majeure should delay the performance of the obligations provided for in the rules for a period of more than one (1) month, the Organizing Company may terminate the contest, without any compensation being claimed.

14 Applicable law - Disputes

The Regulations and the General Conditions are subject to the provisions of French Law. Any difficulty which may arise from the application or interpretation of these Rules or which is not foreseen by these Rules shall be decided by the Organizing Company. Any dispute relating to the Contest may not be dealt with after the thirty (30) calendar days from the last opening day of the Contest.

The Tribunal shall have exclusive jurisdiction to recognize the validity of these Rules. Any dispute arising on the occasion of the Contest and which cannot be settled amicably will be submitted to the competent court in Paris.
